

# MEGATOR

*Pumping & Pollution Control Solutions*

Megator sliding-shoe pumps have for many years been selected and installed in the merchant fleets and navies of many countries, including the Royal Navy and United States Navy. The pumps have an unrivalled combination of advantages for marine service within their capacity range, performing with equal efficiency on many of the pumping duties required on-board ship.

📍 H150 pump

📍 L125V Bilge pump

## Typical applications include:

- 📍 Oily Bilge Pumps
- 📍 Separator Sludge Pumps
- 📍 Grey Water Transfer Pumps
- 📍 Fuel Oil Transfer Pumps
- 📍 Lub Oil Transfer Pumps
- 📍 Ballast Pumps
- 📍 Fresh Water Pressure Units
- 📍 Salt Water Pressure Units
- 📍 Low Magnetic Pumps
- 📍 Ultra-Violet Purification Units
- 📍 Black Water Pumps
- 📍 Fuel Stripping Pumps

- 📍 HMS Ocean - Amphibious Helicopter Carrier, fitted with H150 sullage pumps, L150 oily bilge pumps, H400 & L300 grey water pumps.

**Marine Applications**

🔦 Twin pump marine pressure set, incorporating UV sterilizing unit

🔦 L400 bronze bilge pump, 50m<sup>3</sup>/hr capacity

🔦 L125 pumpsets supplied to Royal Navy for window-washing duties aboard HMS Albion & HMS Bulwark

🔦 MV Schippersgracht container vessel, fitted with H400 sludge pumps

🔦 Simple construction makes for rapid, unhampered maintenance inspection.

🔦 L125 fuel oil pump
